

Rabobank Assignment for Team Native

Hi, and thank you for taking the time to do this assignment.

It is meant to help us determine what you focus on and are capable of regarding the development of a mobile application.

This assignment should have an attached CSV file named 'issues.csv'.

We would like you to do the following:

Create an app that is capable of visualizing the contents of the attached csv file on the screen. Make sure you do not block the UI thread during parsing and please be aware that we have other internal csv files that we will use to validate your work.

As a bonus, you can impress us with the following:

- Structure / Architecture
- Application lifecycle
- Testing

We look forward to reviewing your work.

Good Luck!
